
Matchmaking System Dating website D8Finder Peer-Reviewed Report

Version: V1.1
Date: 2.11.2018
Sponsor: Reza Soltanpoor
Number: Project #1
Author: Matthew Hezel[s3486053]

The functions of the website that Jimin Ahn did are Login/logout, delete account, change password, the listing of user the algorithm produces to like or pass and edit preferences. The Documents he did are the Product backlog, Issue and risk register, and User stories.

Good

Jimin is a hard worker and very reliable as he only misses one or two online meetings but not without reason. He often took charge when Morgan was not at the online meeting and responded with a reasonable time to any question or clarifications that I had. He also acted in a nice a professional manner.

Bad

I believe English is Jimin's second language so there were some language gaps and a miscommunication happened once or twice, but I was also to blame as I did not factor in the fact when writing some of my question or responses. The only reason I mention this is because an employer may be less understanding.

Moonyoung Jung

Documentation contribution for Moonyoung Jung are the OWASP, Project Charter, Technical Report, Meeting Notes, WireFrames and User Manuals. Functionality she did include Login, Matching Making Algorithm, and Password Hashing.

Good

Moonyoung was well organized and was often the first person to initiate the online meeting. She was professional and courteous when asking you to do a task or clarify something.

Bad

I did not have to work directly with Moonyoung too often so I do not have a lot to say but one time she asked me to do something and I said I would and she ended up doing it before I had got around to it, but I do start working on the project mainly in the afternoon so it is also my fault.

Morgan Sylen

The Functions that Morgan worked on were Registration of users, Email validation of the registered users and sending invitations to other people. The Documentation Morgan Sylen contributed to includes the Technical Solutions documentation and the Project Charter.

Good

Smart and capable with any tasks that he assigned to himself and was good at problem solving. Professional in conduct as he has real world experience and able to balance work/school life in an adequate manner. He also was a good mediator when needed.

Bad

The main issue was that he did not respond to messages often and had trouble attending the online meeting regularly.

Xin Xie

The Functions Xie Xin worked on the UI such as navigation bar, background image, header and other such aspects of the website. The Documentation done by Xin Xin are UI performance Guide and contributed to the Project Charter.

Good

Eager to help where he could and frequently ask tell him about any issues or bugs in his code that he needed to fix. He attended the online meeting regularly and was on time for them almost always. He has shown good improvement in using HTML,CSS, and PHP programming languages.

Bad

There were some issues with communication as english was his second language and HTML, PHP, and CSS were not his programming language of choice so it sometime took him awhile to do simple task as he had to learn while implementing it (mainly at the start).
