

Dating Website / Matchmaking System

In class team meeting in week 4 Meeting No: 7

MEETING DETAILS

DATE:	10/08/2018
TIME:	12:30 - 14:30
VENUE:	014.06.019 / RMIT
ATTENDEES:	Xin Xie
	Moonyoung Jung
	Matthew Hezel
	Jimin Ahn

AGENDA

- **Discussed topic during the meeting:**
 - Client provided a feedback for the team (system, functional requirements for the website)
 - After getting a feedback and having a discussion with the team members, our team decided to change project topic because we realised that our original topic (used car sales) doesn't really fulfill the 'matchmaking system' requirements and too complicated to implement all required functions. All members agreed that 'dating' website meets the requirements of matchmaking systems and less complicated to implement all required functions.
 - This was decided because our team wanted to have better project outcome for the client and team.
- **Team tasks for everyone:**
 - Research about system requirements for the new project topic.
 - Communicate regularly via team communication channel (Slack) regarding any team issues.
- **Individual tasks for each member this week:**
 - Keep record individual time sheets.
 - Prepare for the next team meeting.
- **Our next team scrum meeting will be held on next Monday (13/08/2018) 18:00 at RMIT.**
 - Discuss about new project requirements.
 - Divide individual tasks for everyone.
