Dating Website / Matchmaking System

Online team scrum meeting in week 6
Meeting No: 10

AGENDA

- **DONE:**
  - Jimin AHN(Product Owner): Based on Sponsor meeting note, compete the new product backlog list, Use case diagram.
  - Moon: Added 'Age' field in registration form, edit database to link form data, user can see their age information after they register and log in.
  - Matt: Have not done anything yet.
  - Xin: Have not done anything yet.
  - Morgan: Nothing created but research done.

- **TO DO:**
  - Jimin AHN(Product Owner): Add the age verification feature in Register page.
  - Moon: Create a wireframe for sprint 3. Maybe need some modification on age field, change format to DD/MM/YY. (now it is just a textarea)
  - Matt: Work on change password
  - Xin: Create a layout for password change, making a website logo.
  - Morgan: Working on the email verification.

- **Obstacle**:
  - Jimin AHN(Product Owner): Too much information in external resource and lack of skill in Web programming. Expected to have extra training time during the break periods.
  - Moon: Needed some time to work out the code.
  - Matt: Self motivation.
  - Xin: None.
  - Morgan: No prior experience with making something like this.

- Note
  - Write the profile use case is added
  - Age verification use case is added
  - Mail verification use case is added

- Sending invitation use case is added
